

When we empathize with someone  
and take a responsibility on their behalf  
we gain **solidarity** with them.

## Canada Ontario's KW Region and Its Role in World Ecology

This petition is for funding and establishing permanent offices of diplomatic liaisons from multiple countries in a single building at Kitchener, Ontario named “**Solidarity**”. This civic building and program will embody conflict prevention and resolution through democratic exchange among diverse communities.

As a social impact project, this proposal is aligned with municipal, regional, provincial and federal mandates. Tangible implementation of such mandates would be reflected in a coordinated civic gesture by Canadian security agencies. Heads and staff of these security agencies could continuously interface with community members as well as the diplomatic liaisons of subscribing embassies in:

[Solidarity. 200 Frederick St. Kitchener. ON. N2H 6N9](#)

*Our security and refuge is within our service to human ecology!*

This building complex and program’s main service would be cultural education, research and linguistic support for public health and safety. Certainly, our security and refuge is within our service to human ecology.

Currently, the building at 200 Frederick Street is at risk of being misappropriated towards heavier policing in Kitchener-Waterloo Region. Spending tax-payer monies on covert and overt paramilitary activities, ubiquitous surveillance, fickle face-recognition technology, censorship and reprimands to “control” lower income groups is simply wrong! In direct opposition to such autocratic means and ends, Solidarity is a project for allocating resources towards research and context driven cultural support. The main focus of activities in Solidarity would be to aid vulnerable

community members like seniors, children and persons needing individualized care due to injury, disease, trauma, or linguistic and economic challenges.

Forcing thousands of dazed refugees and immigrants into low paying dull-dirty-dangerous jobs, ill health and social unrest shouldn't be North America's reality, yet again! In being mindful to prevent such atrocities we must not ignore the concerns of Indigenous and First Nations peoples nor let them get diluted by newer issues stemming from migrations and dwindling habitats. We must not let visitors, newcomers or integrated residents of any origin, status and orientation suffer due to invisible, unreported crimes. Sophisticated cyber and socioeconomic crimes conducted by domestic and international hate groups that evade common law have continued to escalate in number as well as severity since 2016.

With the backdrop of such realities, Solidarity as a diplomatic culture centre will be accessible to the large influx of immigrants and refugees in Kitchener-Waterloo Region. Building solidarity where social cracks are already evident is necessary to protect Canada's natural heritage and promote human rights of all diasporas.

### **Necessity for a diplomatic culture centre:**

A diplomatic culture centre builds community and enhances cross-cultural collaboration through talks, conferences and exhibitions. These events can also raise funds through sale of arts, music and food of participating members.

To fulfill this aim, composers, performers and crafts people with unique Canadian experiences and international inspirations can host cultural and climate change dialogue through daily events at 200 Frederick Street. Along with these hosts at Solidarity, commissioned liaisons from embassies of allied countries can facilitate bilateral initiatives through Canadian-run organizations. These liaisons will provide context and mutually verifiable intelligence to manage change in Canadian communities with ties to abroad. This authentic, open sourced and peer reviewed intelligence is critical for addressing misinformation that inhibits multicultural and interfaith collaboration.

Immigration and migration to Kitchener is happening at a greater rate than other areas within Ontario. This region has the greatest social need for a secure centre built for harnessing diplomatic resources. Concerted discussions and events at Solidarity will give local businesses and tourism a wholesome strength to brave through modern trade wars, pandemics or recessions. These high-tech, eco-friendly businesses and the mighty base of well educated Ontarians can continue to support Canada, not only from Ottawa or Toronto, but also from the heart of Canada's Maker Community - Kitchener.

Establishing solidarity among residents needs to be the top priority of this year for restoring our government's vision to 20-20. All public services and infrastructure have been stretched far beyond breaking point over the past decades. We are now witnessing the tragic case of Ontario's workers who were and still are systematically denied livable wages and sensible opportunities for building equity. Whether we like to admit it or not, our federal and provincial governments have run out of credit, cash, gas and even grass to alleviate this situation! Restoring our community's sociotechnical health and emotional wellness begins with acknowledging the grave mistakes and violations of our past. Following this crucial step we can practice the values we hold to be true as basic human beings.

Though the past has ceased to exist, its forensic evidence is available in the present to anyone who can recognize it. Though the future has yet to exist, its fortunate potential is available in the present to anyone who can cognize it.

### **Investing in Social Impact with Solidarity:**

Cultural upliftment through care and consideration distinguishes Kitchener-Waterloo Region's spirit in our contemporary world. Canadians and Ontarians in particular, have continued to provide respite, refuge and rehabilitation to global citizens in need of it. We do this cheerfully even in a world fraught with rancour, pollution, confusion and dejected resignation. We do this trustingly, to preserve the dignity of ordinary people who seek earnest living.

All of us deserve dignity and sustenance, alongside each other in a safe environment free of toxic pollution. We are in nature and from nature. So in solidarity with all persons in Canada, we are to invest our volition, skills and creativity, here and now, to remain uncorrupted by greed, miserliness, hatred and abject apathy.

As we bolster the relevance of the Canadian spirit in global affairs, we can do so with situational awareness and prudence for the needs of our households and immediate neighbourhoods. Residents and visitors from all backgrounds deserve cherishable moments from life in Canada. So, may all of us in each realm have vitality, grace and goodness from The Eternal Cherisher of all realms!
